

PDF EXAMPLE

Fields you can search:

text:"phrase" Title + note + OCR'd attachment text contains "phrase".

text(+):"phrase" Same as above (the (+) is optional).

text(-):"phrase" Must NOT contain "phrase".

tag:projectX Node has tag 'projectX'.

tag(+):projectX Same as above.

tag(-):projectX Node does NOT have tag 'projectX'.

tag:"two words" Tag names with spaces need quotes.

attachment:yes Node has at least one attached file.

attachment:no Node has no attached files.

node attachment:yes Same as 'attachment:yes' (longer form).

todo:yes Node is marked as a todo.
todo:no Node is NOT marked as a todo.
todo:overdue Marked AND (no due date OR due date < today).
Matches what the Todo panel calls "overdue",
including items with no due date set.
todo:none Marked but no due date set.
todo:recurring Marked with a recurrence rule (daily / weekly / etc).

todo:before 31/12/2026 Marked todo with due date before 31/12/2026.
todo:before or on today Marked todo due on/before today (includes
no-due-date — same overdue carve-out as due:).
todo:after 1/1/2027 Marked todo with due date after 1/1/2027.
todo:after or on 1/1/2027 Marked todo due on/after 1/1/2027.
todo:on 15/3/2027 Marked todo due exactly on 15/3/2027.
todo:between 1/3/2027 and 31/3/2027 Marked todo due in that range.
(Same date shortcuts work: today, tomorrow, yesterday, N days ago, etc.)

edit:before 31/12/2025 Last edited before 31/12/2025.
edit:before or on 31/12/2025 Last edited on or before 31/12/2025.
edit:after 1/1/2026 Last edited after 1/1/2026.
edit:after or on 1/1/2026 Last edited on or after 1/1/2026.
edit:on 15/3/2026 Last edited on 15/3/2026 specifically.
edit:between 1/1/2026 and 31/3/2026 Last edited in that range.

created:... Same forms as edit:, but for node creation date.
due:... Same forms, but for todo due dates. NOTE: a todo
with NO due date set is treated as "overdue from
today" — so `due:before today` and
`due:before or on today` will INCLUDE no-due-date
todos. `due:after today` etc. exclude them.
review:... Same forms, but for spaced-rep review dates.
review:bad Reviewed but answered incorrectly (step reset to 1).

Date shortcuts (work anywhere a date is expected):

today Today's date.

tomorrow Tomorrow.

yesterday Yesterday.

3 days ago Three days before today.

2 weeks later Two weeks after today.

1 month ago One calendar month back (day clamps to month end).

6 months later Six calendar months forward.

Combining filters:

& AND — both sides must match.

or OR — either side may match.

() Parentheses force grouping.

Precedence:

Without brackets, evaluation is STRICT LEFT-TO-RIGHT.

So x or y & z parses as (x or y) & z.

Use parens whenever you want different grouping.

Examples:

text:"vaccine" & edit:after 1 month ago

tag:reviewed & review:before or on today

(tag:urgent or tag:overdue) & due:before tomorrow

text(-):"draft" & attachment:yes

text:"plan" & edit:between 1/1/2026 and 31/3/2026

Save a search to re-run it later with one click; bind to Shift+Alt+1..9
for a keyboard jump.
